

Real!

NORTHERN COLLEGE

September 10, 2008

Andy Attwater
Manager Human Resources/Safety & Training
P.O. Box 998
34 Duncan Ave North
Kirkland Lake, ON P2N 3L3

Dear Andy,

Northern College's Haileybury School of Mines vision is to develop stronger links with the mining industry in order to deliver specialized and state-of-the-art educational and training products. It is important for the College to partner with companies that are committed to support high quality training solutions for the long term. Cabo Drilling (Ontario) Corporation embodies this kind of relationship and Northern College is very proud to partner with them to deliver the very successful Surface Diamond Driller Assistant Common Core program. Thanks to this program, we are able to train new workers for the mining exploration industry in Canada.

This program would not have been possible without the dedication of the Kirkland Lake operation in providing not only equipment and supplies but also guidance and encouragement to our College's Apprenticeship, Workforce Development and Training team. We found the staff and management at Cabo Drilling to be highly professional in our relationship. It is a pleasure to work with such dedicated and enthusiastic team players.

We look forward to continue growing the partnership and potentially attaining our goal in creating an International Surface Diamond Drilling School in Kirkland Lake.

Sincerely

Rose-Lyne D'Aoust-Messier
